**Please note we are now only accepting requests for boulevard tree planting in
Spring 2026.**

Request A Tree

Name: _____

Street Address: _____

Email Address: _____

Please choose 3 different tree species from the available list of boulevard trees.

Note: Final decisions will be made by Council and based on tree availability.

Tree species choice #1: _____ # of trees requested: _____

Tree species choice #2: _____ # of trees requested: _____

Tree species choice #3: _____ # of trees requested: _____

WHAT YOU CAN EXPECT FROM THE VILLAGE

A green stake will be placed on the boulevard to mark the area where the tree will be planted and the notice will include the species selected. If there are no underground utility conflicts, you will be notified of the date of planting. **Requests we are unable to fulfill due to tree availability will carry over to next year.** The Village will provide establishment watering for at least three years, but additional watering by homeowners is encouraged during periods of drought. The Village is responsible for all pruning maintenance throughout the lifespan of the tree.

WHAT YOU CAN DO TO HELP THE VILLAGE

Avoid herbicide damage when you look after the grass around the tree. Do not apply any herbicide in the area near the root ball, trunk or leaves. Keep grass and weeds away from the trunk. Trees can establish more quickly when not competing with other plants for nutrients and water. Avoid damaging the bark with grass trimmers. Mulch with wood chips or other organic mulch around the base of the tree to keep soil cool and moisture in. Keep mulch away from the trunk of the tree.
